QC-MNX IN-LINE CARTRIDGE MAGNESIUM BED

AC-ILW-QC-MNX

Magnesium Booster is a magnesium cartridge with innovative MNX bed technology containing high quality magnesium. This bed releases 35 mg/l* of pure magnesium into the water.

Water filtered with the magnesium cartridge is the best alternative to bottled water.

Drinking water mineralised with magnesium is a real pleasure. When combined with tea and coffee, it brings out their flavours perfectly.

Magnesium from the Magnesium Booster cartridge is a tasty and convenient alternative to magnesium in tablet form.

TECHNICAL DATA

PARAMETER		UNIT	VALUE
Dimensions	Diameter	mm	55
	Length	mm	262
Connection method		-	1/4 QC
Medium		-	MNX bed
Change in TDS after 1h of saturation		ppm	55
Service life**		months	6
		l	~1000
Maximum operating temperature		°C	38
Maximum operating pressure		bar	6
Certificates		-	PZH, BPA Free
Net weight		g	275
Quantity per package		pcs.	25

*depending on the input water parameters, the maximum value may vary by ±20%.
**life of the cartridge depends on usage and the quality of incoming water.

Amount of ions released after 1 h standstill depending on the number of days since the cartridge was used
